**Subject:** Docket # 98N-1038

I oppose the irradiation of foods to be purchased in the United States. I realize that irradiation may continue, but I want to be aware of the treatment of the foods I buy. Just as I can choose to buy organic foods, I have a right to buy non-irradiated foods. Therefore, I want irradiated foods to be required to be clearly labelled as such so that I can make my food choices, not have them made for me.
